

AI-powered Smart Restaurant Solution

Team Excellence Award

We proudly present this award to

Mohammad Avez

for

solid performance by involved in the Payment terminal and Payment API launch! Not only was a lot of deep collaboration required, but a lot of effort upfront to ensure we have the right design standards, good API design practices, think through edge case and long tail errors, as well as focus explicitly on launch stabilization and monitoring. It is a testament to how great systems can be designed, built and launched successfully (and quickly!)
